1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/28/04 has been entered.
2. Claims 24-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as originally filed does not provide support for the limitation that the composite has an SEAT value equal to or greater than $257 \text{ J-m}^2/\text{Kg}$. The limitation reciting equal to or greater than $257 \text{ J-m}^2/\text{Kg}$ encompasses all values which are greater than 257 and such values are not described in the specification.
3. Claim 27 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 27 it is not clear what the claimed composite is being compared to, i.e., what structure does the composite having the continuous matrix have – what material does the continuous matrix comprise, what is the thickness, density, etc. of the matrix layer, how is the matrix layer disposed relative to the fibers – is it an impregnation, a surface coating, etc? The structure of the composite to which the

Art Unit: 1771

claimed composite is being compared is not definite and therefore the claimed composite is not clearly defined.

4. Applicant's arguments have been fully considered but are moot in view of the new grounds of rejection.
